

Regional GDP per inhabitant in the EU27

## **GDP per inhabitant in 2004 ranged from 24% of the EU27 average in Nord-Est in Romania to 303% in Inner London**

In 2004, GDP per inhabitant<sup>1</sup>, expressed in terms of purchasing power standards<sup>2</sup>, in the **EU27's** 268 NUTS-2<sup>3</sup> regions ranged from 24% of the EU27 average in the region of **Nord-Est** in Romania, to 303% of the average in **Inner London** in the United Kingdom.

This information is taken from data released by **Eurostat, the Statistical Office of the European Communities**.

### **One region in six above 125% of the EU27 average...**

The three leading regions in the ranking of regional GDP per inhabitant in 2004 were **Inner London** in the United Kingdom (303% of the average), the **Grand Duchy of Luxembourg** (251%) and **Bruxelles/Brussels** in Belgium (248%). Among the 46 regions exceeding the 125% level, eight each were in **Germany** and the **United Kingdom**, seven in **Italy**, five in the **Netherlands**, four in **Austria**, three each in **Belgium** and **Spain**, two in **Finland**, one region each in the **Czech Republic**, **Ireland**, **France**, **Slovakia** and **Sweden**, and the **Grand Duchy of Luxembourg**.

It should be noted, however, that in some regions the GDP per inhabitant figures can be significantly influenced by commuter flows. Net commuter inflows in these regions push up production to a level that could not be achieved by the resident active population on its own. The result is that GDP per inhabitant can be overestimated in these regions and underestimated in regions with commuter outflows.

### **...and one in four below 75%**

The fifteen lowest regions in the ranking were all in Bulgaria, Poland and Romania, with the lowest figures recorded in **Nord-Est** in Romania (24% of the average), followed by **Severozapaden**, **Yuzhen tsentralen** and **Severen tsentralen** in Bulgaria (all 26%). Among the 70 regions below the 75% level, fifteen were in **Poland**, eight each in **Greece** and **Romania**, seven in the **Czech Republic**, six each in **Bulgaria** and **Hungary**, four each in **France** (all overseas departments), **Italy** and **Portugal**, three in **Slovakia**, one region in **Spain**, and **Estonia**, **Latvia**, **Lithuania** and **Malta**.

- GDP, and thus GDP per inhabitant, provides a measure of the total economic activity in a region. It may be used to compare the degree of economic development of regions. GDP does not measure the income ultimately available to private households in a region. Details of the methodology used can be found in "Regional Accounts Methods: gross value added and gross fixed capital formation by activity", **Eurostat**, 1995, ISBN 92-827-0159-X.
- The PPS (purchasing power standard) is an artificial currency that takes into account differences in national price levels. This unit allows meaningful volume comparisons of economic indicators over countries. Aggregates expressed in PPS are derived by dividing aggregates in current prices and national currency by the respective Purchasing Power Parity (PPP).
- These data are based on the Nomenclature of Territorial Units for Statistics adopted in May 2003. NUTS 2003 provides a uniform, consistent breakdown of territorial units for the production of regional statistics for the EU. Level 2 of the nomenclature has 268 regions: Belgium (11), Bulgaria (6), the Czech Republic (8), Germany (41), Ireland (2), Greece (13), Spain (19), France (26), Italy (21), Hungary (7), the Netherlands (12), Austria (9), Poland (16), Portugal (7), Romania (8), Slovakia (4), Finland (5), Sweden (8) and the United Kingdom (37). Denmark, Estonia, Cyprus, Latvia, Lithuania, Luxembourg, Malta and Slovenia are all considered as single regions at NUTS 2 level. For a list of the European statistical regions see: <http://ec.europa.eu/eurostat/ramon/nuts>
