## WT18 – The change to education systems Session 3

### Similarities

- Schools/education have an important role in globalization
- The challenge is always to ensure policy is implemented
- The rate at which society is changing is increasing
- It is necessary to have a balance between knowledge, skills, competence, understanding, ethics, creativity, etc. in order to support the development of the whole person
- Education is necessary to advance society and all members of society
- Everyone wants a fair and equitable society but the challenge is to understand what this means in practice

## **WT18 – the change to education systems Session 4**

### **How to enhance the dialogue between China and Europe ?**

- Be well informed about the existing situation and highlight its value
- Determine and develop support for decision makers and administrators
- Develop exchanges
